

## MOSKITO

### FLIP MIRRORS & ADJUSTER

The MOSKITO Flip Mirror MFM is a speedy component to change a light beam in 90° direction. Also right and left versions of these elements are provided. The MFM is designed to insert 1/2" mirrors with 2.5 mm thickness by sticking. Applications:

- Multiple use of one light beam in different set-ups.
- Mixing of different wavelengths
- Laser security purposes
